SIDE PROJECTS

Univer Game Engine (private repository): Game engine written in **C++** using **OpenGL(GLFW), FMOD, ImGui, glm**, etc.

Simple Raytracer (https://github.com/VgTajdd/simple_raytracer): Simple raytracer developed using pure **C++**.

SpriteSheet Generator (https://github.com/VgTajdd/ss_generator): Bin Packing algorithm (recursion & binary trees) using **C++ & Qt**.

NeuroEvolver (<https://github.com/VgTajdd/neuroevolver>): Neuroevolution software written in **Python**.

Chess Engine (<https://github.com/VgTajdd/chess>): Chess engine written in **C++**.

Cubeland (<https://github.com/VgTajdd/cubeland>): 3D Game developed in **Unity**.

Rubik's Cube Simulator (https://github.com/VgTajdd/rubik_openfl): Simulation of rubik cube written in **Haxe**.

Interview Problems (https://github.com/VgTajdd/interview_problems): Interview problems solved in **C++**.

COLLEGE PROJECTS

Fruits and vegetables classifier: Implemented in **C++** (Digital processing of images and/**OpenCV**).

Robotic arm: Implemented using PIC16F877A and servo motors. Controlled by a computer program developed in **C#**.

PID tuning using Genetic Algorithms: Implemented in **C++**, this program generates values for a PID controller using GA.
